ACTIVITY OBJECTIVES
This live CME activity seeks to increase knowledge and equip clinicians by providing them with tools and strategies to more effectively manage patients with diabetes and improve treatment outcomes. At the completion of this activity, participants will be able to:

- Identify how and when to start insulin and other medications for patients with all types of diabetes.
- Recognize the psychosocial factors which most often impact patients with diabetes and team based strategies for support.
- Apply nutritional principles to help patients with diabetes improve health and address comorbidities.
- Identify key non glycemic diabetes outcomes that may affect morbidity and mortality.

REGISTRATION
Continental breakfast, lunch, breaks, and materials via USB drive will be provided. Onsite registration will be available as space allows but may not include lunch.

To register for this activity, please visit: http://com.tu.edu/cme/Calendar.html

On or before October 5th: $100
On or after October 6th: $125

TARGET AUDIENCE
Physicians, pharmacists, and other interested healthcare professionals who provide care for patients with diabetes.
